

Spill Stop Berm™ Drive-Through Berm With Aluminum Angles Side Brackets

Spill Stop Berm™ Drive-Through Berm with Aluminum Angles Side Brackets is compact and durable, and made from XR-5 8130.

They are designed to withstand demanding secondary containment needs including oil, chemicals, and other materials hazardous to the environment.

Consider our optional ground mats for added protection against rough and rocky terrain.

Track mats are also available to help guide vehicles safely into the berm.

- Flexible construction with drive in/ drive out ability. The ends rise as the liquid level rises in the berm thus containing any spill.

High Capacity Option for Spill Response!
