

## Spill Stop Berm™ Drive-Through Berm with Pop-Up “A” side walls

Spill Stop Berm™ Drive-Through Berm with Pop-Up “A” side walls are made from XR-5 8130 material, which is designed to withstand demanding secondary containment needs including oil, chemicals, and any materials hazardous to the environment.

The collapsible “A” frame construction and drive over ends allow for easy, hands free entry and exit. The special inserts that automatically raise the end walls with the spill level make this a perfect choice for any situation or emergency requiring rapid deployment.

Simple and easy to transport, The Pop-up “A” berm comes with its own storage bag.

- Flexible capacity options.
- Versatile in construction with drive in/ drive out ability.
- The ends rise as the liquid level rises in the berm, automatically containing any spill.

**Sturdy, High Volume Spill Berm!**
