Flexitanks
Bulk Liquid Shipping — ISO Box Container Tanks

Flexitanks are for global shipping of non-hazardous and food grade liquids. **FDA, USDA and EEC compliant.** Ideal for bulk liquid transportation in ISO shipping containers or box trucks. Suitable for food grade like shipping flat beer, wine, molasses, egg products, water, oils and Bio diesel, non-hazardous pharmaceutical, chemical and industrial products.

Our standard Flexitank designs allow for transportation of 25,000 - 9,000 liter volumes (44,000 pounds).

Custom sizes and designs are available.

This Simple Solution allows materials to be cost effectively and efficiently shipped globally reducing the landed material cost!

[Flexitanks](#) [Bulk Liquid Shipping — ISO Box Container Tanks](#)

We provide heavy duty, durable *Flexitanks* for **multiple uses or light duty single trip tanks** ("one trippers") suitable for various contact times.

Our tanks are capable of being used in refrigerated box containers, allowing shippers to transport juices, juice concentrates, etc at controlled temperatures. We also can provide Custom Reefer style tanks which allow 2 different materials to be shipped in one container!!!

Bulkhead Fixtures are required and weigh about 100 lbs each. They are required for 20' Flexitank container applications and are completely reusable.

Compatibility:

As one can imagine we have a vast variety of materials, sizes and configurations available. We recommend that Material Safety Data Sheets (MSDS) and trip duration (total contact time) be provided to ensure compatibility and most efficient use of materials. **This data is kept in strictest confidence and is used only to provide sound advice and warranty to meet your needs.**

Our tanks are located in the United States and through strategic partnerships can service your requirements globally. **We strive to provide quality products, service and peace of mind.**

Standard Flexitank Features:

- Unique Quality construction for safe liquid transportation.
- Converts standard dry cargo ISO Shipping container into a one-way bulk liquid transport system
- Standard 50 mm (2 inch) fill/drain fittings with ball valve, dust cap and ball valve with male cam lock. Center vent non-pressure relief cap. (Alternatives available at additional cost)
- More economical than other bulk packaging options like IBC's
- Food grade approved materials are certified
- Completely disposable OR Reusable depending on your needs
- Product handling becomes a lot more versatile with decreased landed material cost.
- **Each tank is uniquely numbered for traceability, and packaged safely for shipping.**
- **Best of all - EASY TO USE!!!**
