

Portable Frac Tanks

Portable Frac Tanks are collapsible and flexible pillow and bladder tanks, perfect for **oilfield operations, industrial pumping and fracking applications** where fast setup times and economical operations are the key. With minimized footprint and available capacity maximization, these tanks are ideal for your project!

Technical Specifications:

- Sizes range from 5,000 gal (20,000 liters) to 500,000 gallons (2 million liters)
- Operates between -58° F to 180° F

Features:

- Portable and easy to deploy with mobile deployment unit
- 50% better heat retention than steel
- No support matting required
- Huge savings on trucking costs
- Can be customized to meet any size requirements

Optional Accessories:

- Mobile deployment unit
- Manifolds, Heating Unit, Covers, Hoses
- Additional Valves, Drains, and Fittings
- Patch & Repair Kits

Hassle Free, Quick and Easy to Set Up and Deploy!

Portable Frac Tanks

Technical Specifications:

Liner Material (standard):

- Heavy Duty Urethane
- Other materials available upon request.

Standard Sizes:

(Custom Sizes are Available)

Liner Material	Capacity	Application	Part Number
32 oz Urethane	20,000 gal/ 75,000 l	Hydrocarbons/Fuel	PTHCH020K3020J
32 oz Urethane	50,000 gal/ 200,000 l	Hydrocarbons/Fuel	PTHCH050K3020J
32 oz Urethane	70,000 gal/250,000 l	Hydrocarbons/Fuel	PTHCH070K4020J
32 oz Urethane	95,000 gal/350,000 l	Hydrocarbons/Fuel	PTHCH095K4020J
32 oz Urethane	20,000 gal/75,000 l	Potable Water	PTWPH020K3020J
32 oz Urethane	50,000 gal/200,000 l	Potable Water	PTWPH050K3020J
32 oz Urethane	70,000 gal/250,000 l	Potable Water	PTWPH070K4020J
34 oz Urethane	100,000 gal/380,000 l	Potable Water	PTWPH100K4020J
34 oz Urethane	250,000 gal/950,000 l	Potable Water	PTWPH250K4020J
